MEDICAL SCHOOL

DEPARTMENT OF
Global Health and
Social Medicine

Global Health Equity Research Fellowship

The Department of Global Health and Social Medicine is seeking a post-doctoral fellow for the two-year Global Health Equity (GHE) Research Fellowship.* The Fellow will join the Harvard Medical School Global Health Research Core, directed by Professor Megan Murray, and will be based at a Partners In Health-supported site in Rwanda joining a multidisciplinary team of practitioners, program managers, policy makers, and researchers. During the fellowship, the fellow will **conduct high quality research on health needs and program implementation** and **support a broader research capacity building program and the mentoring of junior researchers** in research methods and results dissemination.

Implementation, operational, and scientific research is a principal mission of the HMS Global Health Research Core and Partners In Health. In 2012, Partners In Health-Rwanda, with the support of the Research Core, launched a comprehensive research capacity building program with the aim to cultivate a culture of research and develop technical skills and research leadership at Global Health Delivery Partnership-supported sites. The research spans a variety of health topics aimed at improving service delivery and health outcomes in Rwanda and in other low and middle income countries. Priority research areas for Partners In Health-Rwanda include women's health, oncology, non-communicable diseases, HIV, maternal and child health, nutrition, and health systems strengthening. The GHE Research Fellow will develop research within a priority research area(s) and support research capacity building within this topic area.

Successful candidates will have recently completed the PhD (or equivalent) in public health, epidemiology, biostatistics, global health, or a related field. Applicants should have 1) strong quantitative skills, 2) strong scientific writing and communication skills, and 3) previous teaching experience. Experience living/working in a cross-cultural environment and French fluency are preferred.

* The appointee would be employed by Harvard Global Support Services.

Anticipated start date: March 1 or as soon as possible

Salary range: US\$50-55,000

Relocation costs are negotiable

Interested applicants should send their cover letter, CV, and contact information for three references in one PDF named “[your last name, first initial]_GHE-fellow-application-2018” to Rebecca Grow (email: rgrow@hms.harvard.edu).
